

UNITY THROUGH DIVERSITY

Spiritual Development	Moral Development	Social Development	Cultural Development
Opportunities to reflect on aspects of their lives and the human condition e.g. through literature, theatre, music, art, science, religious education. Ensuring pupils acquire beliefs and values, which form the basis for personal and social behaviours.	Opportunities to uphold a series of values, which will serve them well throughout their lives. Developing moral values by providing opportunities e.g. by looking at choices, focusing on right and wrong and the idea of justice. Respecting the well-being and rights of others.	Developing the skills required to become active citizens so that they can participate responsibly in the communities to which they belong. Learning the skills of co-operation, initiative, responsibility and collaboration.	Exploring and understanding their own cultural identity and the cultural diversity within the community and wider world. Showing tolerance, understanding and empathy.

We are a Thrive school: this means that we have adopted a therapeutic approach to help support the emotional and social development of our pupils.
